What happened this month

- **Record revenue, lower profit.** Revenue was the highest of the year, but profit fell from \$5,837 to \$1,450 because supplies jumped to \$5,738 (28% of revenue vs about 8% over 12 months).
- **Two purchases explain most of it:** \$2,480 at Uline (usually about \$341) and \$1,150 at a new equipment vendor. If the \$1,150 is equipment, recording it as an asset would lift August profit to about \$2,600.
- **Labor is improving:** wages and contract labor were 46.9% of revenue, down from 52.2% in July and 58.5% over 12 months.
- **Cash:** \$1,400 of customer invoices are more than 30 days late, including \$880 from Client C at 105 days.
- **Mileage:** no August trips logged yet; 2,079 business miles so far in 2026, an estimated \$1,520 deduction at the IRS standard rate (your CPA confirms the method).
- **12 open questions** (page 2) need your answers before the books can be closed for August.
