

JT Healthcare Analytics: services and fixed fees

Fixed-scope reviews on your own data, results in 10 business days, then optional monthly tracking in a web dashboard or Power BI · October 2026

Start here (any organization)

Service	What you get	Fixed fee
Free snapshot	One page comparing you with Georgia peers on public CMS data (practices, hospitals, nursing homes, VA)	Free
Data quality audit	Every column of an export checked: missing, duplicate, invalid and impossible values, incomplete months; issue list with fixes	\$1,500-\$3,000, credited toward any review within 60 days
Power BI dashboard on your data	Model, measures and a dashboard page for one area, delivered as a Power BI project file you own	\$1,500-\$3,500 per dashboard

Independent clinics and medical groups

Service	What you get	Fixed fee
Denial and underpayment review	Where denials come from, root causes and owners, appeal worklist by deadline, payers paying below contract	\$2,500-\$6,000
No-show review	No-show risk score trained on your own history, call list for the upcoming schedule, overbooking guide	\$2,000-\$5,000
Provider productivity scorecard	wRVUs per provider and clinical FTE vs your benchmarks, E/M mix vs peers, G2211 and care-management use, pay per wRVU	\$2,500-\$5,000; quarterly refresh \$750-\$1,500
Quality gaps review	Cancer screening, diabetes, blood pressure, wellness visits, post-discharge follow-up by site; outreach list of gaps still closable this year	\$2,500-\$5,000; monthly list \$400-\$900
Clinic Performance Review	Productivity + quality gaps + denials, one findings meeting	\$6,000-\$12,000
Monthly practice dashboard	Denials, no-shows, quality and productivity updated monthly with a one-page summary	\$500-\$1,500/month

Medicare Advantage, ACO and value-based groups

Service	What you get	Fixed fee
Claims Cost & Risk Review	Cost per member per month by category and PCP group, CMS-HCC V28 risk score for every member, risk-adjusted group scorecard, chronic-condition recapture list, high-cost list	\$7,500-\$15,000
Monthly recapture + quality lists	Refreshed recapture and quality gap lists per PCP group, monthly summary, Power BI dashboard	\$1,500-\$3,500/month

Hospitals (25-300 beds)

Service	What you get	Fixed fee
Length of stay review	Extra bed-days against DRG and severity norms by unit, attending and discharge destination, priced in dollars	\$6,000-\$12,000
ER wait time review	Door-to-provider waits, walkouts, time in ED and boarding by hour and day vs Georgia and U.S. CMS results	\$5,000-\$10,000 (\$9,000-\$18,000 with length of stay)
Readmission review	Conditions, units and discharge patterns driving readmissions; high-risk flag; fix list	\$5,000-\$12,000
Monthly tracking	Dashboard for the chosen area, refreshed monthly	\$800-\$2,000/month

How it works

- **Week 0:** 30-minute scope call, Business Associate Agreement and engagement letter; we agree the question and the export (no names or notes needed for most reviews).
- **Weeks 1-2:** data quality check, analysis, findings meeting with the numbers, the worklists and a 90-day plan. Fixed fee: no percentage of recoveries.
- **After:** keep the dashboard (web or Power BI) and refresh it monthly, or take the files and run it yourself.

Samples on request (clinic performance, claims cost and risk, denials and no-shows, length of stay, ER, data quality + Power BI). Fees are starting ranges set by data volume and number of sites. Analysis runs on JT's encrypted computer; JT analyzes and prepares, your staff decide and act.
