

SAMPLE Data Quality Audit + Power BI Dashboard

Find what is wrong with your data before anyone decides on it; then see it every month in Power BI · JT Healthcare Analytics

5,862

Claim lines checked (synthetic sample)

96.8%

Rows passing every check

10

High-priority issue types found

151

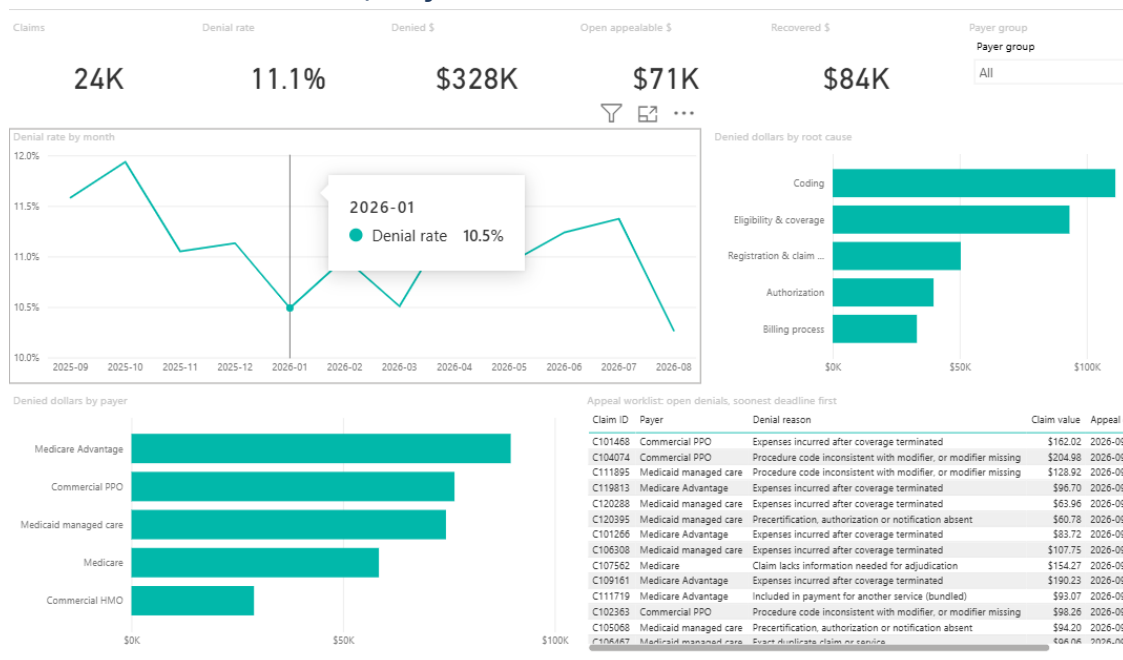

Rows in August: month incomplete

What the audit found in the sample claims export

Check	Column	Rows	How to fix
Exact duplicate rows		24	Remove duplicates before counting volumes or dollars
paid_date before service_date		18	The later event is dated before the earlier one
Paid more than allowed_amount		12	Payment above the allowed/billed amount usually means a posting error or an overpayment to
Invalid CPT/HCPCS format	cpt	10	CPT codes are 5 digits (or 4 digits + F/T/U)
Invalid ICD-10-CM format	icd10_primary	9	Codes like 250.00 or 401.9 are ICD-9
NPI fails the check digit	rendering_npi	9	A valid NPI is 10 digits with a Luhn check digit
Same ID on different rows	claim_id	8	Confirm whether these are corrected/replacement records (keep the latest) or true duplicat

Also caught: duplicate rows carrying \$6,251 of billed charges, an incomplete last month that would have looked like a 70% volume drop, and payer names spelled several ways.

Then the numbers live in Power BI, on your data

Power BI dashboard generated from the denial review (synthetic practice): cards, monthly trend, root causes, payers and an appeal workflow sorted by deadline. Delivered as a Power BI project file; refresh each month with a new export.

Fees

Service	Deliverable	Fixed fee
Data quality audit	Every column profiled; missing, duplicate, invalid and impossible values; incomplete months; issue list with fixes and first rows to correct	\$1,500-\$3,000 (credited toward any review within 60 days)
Power BI dashboard on your data	Model, measures and dashboard page for one area (denials, no-shows, quality gaps, productivity, length of stay, ER, claims cost)	\$1,500-\$3,500 per dashboard

Works with any CSV export (claims, remittances, encounters, scheduling, discharges, ED visits). Files are checked on JT's encrypted computer under a Business Associate Agreement; nothing is uploaded to outside services. **Contact:** Jean Tra, JT Reliable Solutions, LLC, Atlanta, GA | jean.tra@jtreliablesolutions.com | 404-282-2345
